**Importance:** High

Robert

In response to the comments for the Palm Beach county NPDES Phase I report.

- 1) Section VII, Part III.A6 "Pesticides, Herbicides, and Fertilizer Application. The Turnpike only uses Herbicide. Pesticides and fertilizers are not used. Our herbicides are applied by a contract and we do not conduct any public outreach or education because of the Turnpike Right-of-way being a limited access toll road with now residential use within it.
- 2) Section VII, Part III.A.7.a "illicit discharges and improper Disposal" There were no final inspections conducted for Drainage Connections in Palm Beach county during year 7. The report should have stated "0"
