RE: Palm Beach County MS4 Annual Report Comments

Dear Mr. Wertepney:

In response to the comments of our Year 5 report I have the following:

Comment 1: Our public outreach is addressed through our handouts that are provided at our Village Hall. They are included in our new resident package and are always available to the public.

Comment 2: Our service technicians are always looking for illicit discharges to our stormwater system, since we have a proactive inspection system in place we are consistently checking for illicit discharges.

Comment3: We have only one employee in the Stormwater Department, but we utilize cross trained service technicians from the Water Utility to help with our inspections. They have all watched the FDEP Erosion and Sediment Control Inspector Training Video this reporting year. We plan on getting more training on illicit discharges for the next reporting period.

Comment4: Our Fire Department handles all spill responses.

Comment 5: Our Department of Community Development advises all applicants of the responsibility to submit for an NOI. It was an error on the report.

If you require any additional information, or have any question, please feel free to contact me at 575-6233.

Sincerely,

Russell K. White
