**RE: PBC MS4, NPDES Permit No. FLS000018
6 Year Annual Report Comments
City of Atlantis
SJE Project # 04028.001**

Dear Mr. Kelly;

This letter is pursuant to your letter dated May 4, 2009 and is in response to SAIC's requests for additional information for the City of Atlantis. The comments are repeated below (to assist the reader) then these comments are followed by our responses.

City of Atlantis

- 1) Section IV, Fiscal Analysis: Please confirm if the figure provided includes all of the expenses incurred for all of the activities reported on in Section VII of the Annual Report.

Section IV, Fiscal Analysis includes all NPDES relevant expenditures except personnel. The City does not prorate salaries as it relates to NPDES.

- 2) Section VII, Part III.A.3 "Roadways": The permittee reported "0" for the number of applicable municipal equipment yards and maintenance shops, and the frequency or number of inspections performed of those yards/shops. However, the permittee also provided a comment that there is one storage yard. Please provide an explanation of why the storage yard is not considered by the permittee to be an applicable municipal equipment yard/maintenance shop for the purposes of Part III.A.3 of the permit.

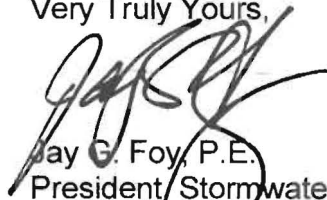

Note: This was also a Year 5 Annual Report Comment.

The City has minimal equipment stored and what is stored is under a covered roof on a concrete pad with open sides. No maintenance is done on site. We do not believe it is the intent of this reporting program to scribe reports for such areas. Should our understanding be incorrect we will revise our reporting paperwork.

Note: This was also our response to the same comment in previous years.

We trust the above satisfactorily answers your request for additional information.

Very Truly Yours,

Jay G. Foy, P.E.
President/StormwaterJ Engineering, Inc.
Engineer, City of Atlantis
