**Re: NPDES Year 1, Cycle 3 Annual Report  
Town of Manalapan  
Engenuity Group Project No. 6001.01**

Dear Mr. Kuhl:

The following information is being submitted on behalf of the Town of Manalapan in response to the April 12, 2012 comment letter from the FDEP for NPDES Permit No. FLS000018:

1. Section VII, Part III.A.3 of the Annual Report form requires the permittee to implement and report the frequency, extent, and amount of litter collected (estimate) during the reporting period. Report the activities performed or explain why the required elements of this section were not performed in Column F "Comments".

**Town of Manalapan Building Department is responsible for litter collection for 5.34 miles of roads. The amount collected is approximately one (1) bag of debris per month. The bag size is 33 gallon. Also, the Town's residents are responsible for the collection of debris on their own properties.**

2. Section VII, Part III.A.7.c of the Annual Report form requires the permittee to report the number of proactive inspections, illicit activities discovered, and the number and type of enforcement actions performed. Provide the information requested or the appropriate explanation in Column F "Comments" for activities not performed as required by this section of the Annual Report.

**The Town of Manalapan performs proactive inspections and catch basin inspections at the same time. They are completed at the beginning of each month for the 12 catch basins maintained by the Town. For this reporting period, 48 inspections were performed. No illicit discharges were found. If any suspected illicit discharge is observed and the owner does not take action to correct/stop the source, the Building Department will issue a violation notice if it is within the Town jurisdiction. If it is outside of the Town of Manalapan jurisdiction, the proper entity will be notified.**

If you should have any questions please do not hesitate to call.

Sincerely,

Lina Camacho  
Project Engineer
