**Re: NPDES Year 1, Cycle 3 Annual Report
Town of Ocean Ridge
Engenuity Group Project No. 00020.24**

Dear Mr. Kuhl:

The following information is being submitted on behalf of the Town of Ocean Ridge in response to the April 12, 2012 comment letter from the FDEP for NPDES Permit No. FLS000018:

1. Section VII, Part III.A.3 of the Annual Report form requires the permittee to report the frequency of street sweeping activities and the loadings of total nitrogen and phosphorus removed in pounds. Provide the information required in this section or explain why this information is not available in Column F "Comments" of the Annual Report.

Based on the estimated 4.5 cubic yards of material collected bi-annually and using the "Methodology for Calculating Nutrient Load Reductions Using the FSA Assessment tool" the total nitrogen loadings removed is approximately 12 pounds and the total phosphorus loadings removed is 7 pounds.

If you should have any questions please do not hesitate to call.

Sincerely,

Lina Camacho
Project Engineer
