**Subject:** NPDES report

**Importance:** High

Hi Michelle ,

I'm sorry for all the confusion. I am still trying to understand what is going on myself in the construction engineering dept but mostly because we have people that are new and some people that didn't train the new guy on how to fill out report. So i am now working with another engineer and she is on top of it. Lets pray she stays! I asked her about the inspections. There were 192 for 12 sites and only 50% inspected? She said that is a mistake 100% were inspected , they automatically check the BMPS on every inspection.

Let me know if you need any other information and again I am sorry.
