This could include facilities identified through the proactive inspection program as per Part III.A.7.c of the permit. Report on the high risk facilities inventory, including the type and total number of high risk facilities and the number of facilities newly added each year. <i>DEP Note: The TRI is updated every spring / summer by the U.S. EPA at www.epa.gov/triexplorer. SECTION VIII. EVALUATION OF THE STORMWATER MANAGEMENT PROGRAM (SWMP)	
Permit Citation/ SWMP Element	SWMP EVALUATION
A.	Part II.A.1 Structural control inspection and maintenance Strengths: Stormwater division is proactive and conducts monthly inspections and maintenance of the City's MS4 system. Weaknesses: Stormwater division has had vacancies which limited the number of personnel in the field and is currently without a permanent Supervisor. Utilities is actively recruiting and working with Human Resources to fill the vacant positions. SWMP Revisions to address deficiencies: None at this time.
	Part II.A.2 Significant redevelopment Strengths: Construction inspectors monitor redevelopment construction sites and work with contractors to ensure SWPPP and BMPs are followed. Weaknesses: Redevelopment has been slow due to the economic climate, but construction is starting to increase again.

SECTION VIII. EVALUATION OF THE STORMWATER MANAGEMENT PROGRAM (SWMP)

	SWMP Revisions to address deficiencies: None at this time.
	Strengths: Street sweeper operates weekly to remove trash, dirt, and debris from the City's roadways.
	Weaknesses: Some areas could be swept more often due to higher amount of litter/trash. Utilities Dept. is working with Public Works to address these areas. Utilities will also complete a higher percentage of swale restoration.
	SWMP Revisions to address deficiencies: None at this time.
	Strengths: MS4 system operates well to protect residents and businesses from flooding, very few buildings have been impacted during storm events.
	Weaknesses: Some areas have standing water in the roadway after heavy rain events, but ponding/puddles dissipate within 2 to 48 hours depending on rainfall amount. Upcoming CIP project will address a large neighborhood in the eastern part of the City (Central Seacrest Corridor).
	SWMP Revisions to address deficiencies: None at this time.
	Strengths: Environmental inspector conducts regular inspections of facilities and follows up with any deficiencies or corrective actions required.
	Weaknesses: None.
	SWMP Revisions to address deficiencies: None at this time.
	Strengths: City staff and contractors are licensed and trained, and regular application of pesticide, herbicide, and fertilizer is done within the MS4.
	Weaknesses: Monitoring contractors is required to ensure all areas are treated effectively and on schedule.
	SWMP Revisions to address deficiencies: None at this time.
	Strengths: Stormwater Division and environmental inspector look for illicit discharges as part of daily activities and respond to customer complaints to investigate.
	Weaknesses: None.
	SWMP Revisions to address deficiencies: None at this time.
	Strengths: Environmental inspector conducts regular inspections of facilities and follows up with any deficiencies or corrective actions required.
	Weaknesses: None.
	SWMP Revisions to address deficiencies: None at this time.
	Strengths: Construction inspectors monitor active construction sites and work with contractors to ensure SWPPP and BMPs are followed.
	Weaknesses: Some contractors try to cut corners, so daily and weekly inspections are required to make sure proper procedures are followed.

CITY OF BOYNTON BEACH, FLORIDA

EXPLANATION OF MINIMUM INSPECTION FREQUENCIES IN TABLE II.A.1.a NOT BEING MET

April 2015

The number of inspections and maintenance activities for grass treatment swales, MS4 pipes/culverts, and inlets/catch basins/grates are less than 100% during the reporting period of October 1, 2013 through September 30, 2014. However, we are on track to inspect and maintain 100% of these categories over the five (5) year permit cycle.

The fewer number of inspections and maintenance activities has been due to limited staff in our Stormwater Division. The Stormwater Division has had vacancies which limited the number of personnel in the field, and the Stormwater Division is currently without a permanent Supervisor. In addition, Stormwater Division staff is shared periodically with other divisions (Water Distribution and Wastewater Collection and Pumping) to respond to emergencies and perform urgent work. Boynton Beach Utilities is currently working to fill the vacant positions. We will work to complete all required inspection frequencies for the remainder of the current reporting year and future reporting years.
