Part III.A.8.a	Industrial and High-Risk Runoff — Identification of Priorities and Procedures for Inspections				
	Continue to maintain an up-to-date inventory of all existing high risk facilities discharging into the permittee's MS4. The inventory shall identify the outfall and surface water body into which each high risk facility discharges. For the purposes of this permit, high risk facilities include: • Operating municipal landfills; • Hazardous waste treatment, storage, disposal and recovery facilities; • Facilities that are subject to EPCRA Title III, Section 313 (also known as the Toxics Release Inventory (TRI) maintained by the U.S. EPA); and • Any other industrial or commercial discharge that the permittee determines is contributing a substantial pollutant loading to the permittee's MS4. This could include facilities identified through the proactive inspection program as per Part III.A.7.c of the permit. Report on the high risk facilities inventory, including the type and total number of high risk facilities and the number of facilities newly added each year. <u>DEP Note:</u> The TRI is updated every spring / summer by the U.S. EPA at www.epa.gov/triexplorer. Select "Facility" on the left, chose your Geographic Location, and then select "Generate Report." Please indicate in Column F when (month / year) you last checked EPA's TRI for applicable facilities. During Year 1 of the permit, develop and implement a written plan for conducting inspections of high risk facilities to determine compliance with all appropriate aspects of the stormwater program. While the permittee may determine the order and frequency of the inspections, the permittee shall inspect each identified facility at least once during the permit term; however, facilities identified as high risk due to the findings of the proactive inspection program as per Part III.A.7.c of the permit shall be inspected annually. Report on the high risk facilities inspection program, including the number of inspections conducted and the number and type of enforcement actions taken. <u>DEP Note:</u> If "0" is reported for the number of inspections conducted and the permittee has one or more high risk facilities, please provide an explanation in Column F for why no inspections were conducted. SECTION VIII. EVALUATION OF THE STORMWATER MANAGEMENT PROGRAM (SWMP)					
A.	Permit Citation/ SWMP Element	SWMP EVALUATION <i>(This section must be completed)</i>			
	Part II.A.1 Structural control inspection and maintenance	Strengths: Inspections help with the identification of a potential issue/problem that may contribute to an impending failure of the structure. Maintenance of the system contributes to the reduction of pollutant loadings being discharged into the waterways. Weaknesses: None SWMP Revisions to address deficiencies: N/A			
	Part II.A.2 Significant redevelopment	Strengths: In order to manage and protect our water resources, we require that redevelopment projects coordinate their projects with the surrounding regulatory entities (i.e., South Florida Water Management District, Army Corps of Engineers, Lake Worth Drainage District, Florida Department of Transportation) thus allowing us to upgrade stormwater systems. Weaknesses: None SWMP Revisions to address deficiencies: N/A			
	Part II.A.3 Roadways	Strengths: The Litter Control Program (Street Sweeping and Roadside trash pick-up) continues to help with the reduction of pollutants being discharged. Swale Retrofit Program continues to help with the reduction of pollutants begin discharged and reduces water ponding on roadways, which creates a safety hazard. Weaknesses: None SWMP Revisions to address deficiencies: N/A			
	Part II.A.4 Flood control	Strengths: Wellington continues with their inspection, cleaning and repairing of pipes/major culverts to identify any major issues that may impede water flow. Weaknesses: None SWMP Revisions to address deficiencies: No deficiencies were noted.			

SECTION VIII. EVALUATION OF THE STORMWATER MANAGEMENT PROGRAM (SWMP)

Part II.A.5 Waste TSD Facilities	Strengths: N/A - Wellington does not have any facilities.
	Weaknesses:
	SWMP Revisions to address deficiencies:
Part II.A.6 Pesticide, herbicide, fertilizer application	Strengths: Continue to ensure all personnel have proper training in the appropriate application.
	Weaknesses: None
	SWMP Revisions to address deficiencies: N/A
Part II.A.7 Illicit Discharge Detection and Elimination	Strengths: Continued training and education (videos, PSAs & website page(s) info) to ensure detection of any pollutants that might be discharged into the drainage system.
	Weaknesses: Being able to identify the responsible party(ies) when random dumping is found. Sanitary Sewer Overflow reporting is already required of the operator of the sanitary sewer system by FDEP; this seems to be a duplication of reporting efforts.
	SWMP Revisions to address deficiencies: Improvements needed by FDEP to on tracking overflow reports.
Part II.A.8 High Risk Industry Runoff	Strengths: Inspections help detect any pollutants that may be discharging into the drainage system.
	Weaknesses: None
	SWMP Revisions to address deficiencies: N/A
Part II.A.9 Construction Site Runoff	Strengths: We continue to monitor and enforce the NPDES requirements for all private and public sites.
	Weaknesses: Since FDEP has limited inspectors for multiple counties, their assistance in special circumstances is hard to obtain.
	SWMP Revisions to address deficiencies: FDEP still needs to add more personnel.
